OFFICE ACTION

Election/Restriction

1. This invention application contains claims directed to four patentably distinct species:
Group A (1-21): A method of forming a contact in a pixel sensor cell [class 438, subclass 222];
Group B (22-27): A pixel sensor cell [class 257, subclass 14].
Group C (28-33): An imaging device [class 714, subclass 733].
Group D (34-38): A processing system [class 714, subclass 733].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Applicant must choose one species from each of Groups A thru C, because:

- a) Group A compared to Group B: A pixel sensor cell formation vs. a pixel sensor cell, (see MPEP § 806.05(f));
- b) Group A compared to Group C: A pixel sensor cell formation vs. an imaging device, (see MPEP § 806.05(f));
- c) Group A compared to Group D: A pixel sensor cell formation vs. a processing system, (see MPEP § 806.05(f));
- d) Group B compared to Group C: A pixel sensor cell vs. an imaging device, which comprises an array of pixel sensor cell and a signal processing circuitry;
- e) Group B compared to Group D: A pixel sensor cell vs. a processing system, which comprises an image device coupled to a processor and a readout circuit;
- f) Group C compared to Group D: An image device vs. a processing system.

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Note: Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a)

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in. Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement is traversed.
